In connection with the distribution of water for the coming year the following motion was moved by Mr. Moyle, duly seconded by Mr. Nemelka and passed with one negative vote.

RESOLVED: That in the event of low water this year, "low water" being defined as below 325 second feet at the point of diversion between the Jordan River and the surplus canal, that the water is to be divided one-half to the river and its users and one-half to the surplus canal and its users for the water year 1997 only and without prejudice to any of the legal rights of the parties involved.

BE IT FURTHER RESOLVED: That the Committee of the Lower Jordan Water Users Association be and it is hereby authorized and directed to take such steps as are necessary or appropriate to effect the foregoing resolution.

BE IT FURTHER RESOLVED: That the foregoing two resolutions shall be and remain in full force and effect for later water years until

further legal resolution by the lower Jordan Water Users Association.

It was the consensus of the body that a reference to the foregoing resolutions should be included in the minutes of the annual meeting of the Association each year.

Brent Bingham of Bingham Engineers discussed measurement problems at 2100 South when the back up of the North Point take out submerges the weir.

David O. Hinkley reported that the Salt Lake Airport is discussing the possibility of pumping some water from the Jordan River which is now being distributed through a branch of the surplus canal. The Brighton and Northpoint Canal is also asking for some changes. These actions may require more diversion to the River, as opposed to the Surplus Canal, in the future.

There being no further business the meeting was adjourned.
